

Your Maximo Health Check

Your personal SRO Maximo Health Check will enable your organisation to analyse how efficiently you are utilising Maximo. As your business needs change over time, your EAM system will benefit from regular check-ups and fine tuning. SRO will provide a holistic review of your system, including technical systems, business processes & user adoption, to provide an objective summary, including recommendations.

Discover how to optimise your Maximo performance.
All Maximo users are eligible to take advantage of this offer!

Is your Maximo performing to its highest potential?

How confident are you?

What is included in your free health check?

System health

Your Maximo system health is determined through a series of specific SRO reports.

Data analysis

Report findings will include users, configuration and security review.

Data sharing

SRO will share initial findings through a free Maximo workshop, including initial recommendations.

Gap analysis Workshop

You will share user stories and aid SRO in understanding user issues or challenges which are not highlighted in reports.

Final audit report

Your final report will cover all the above areas, with suggestions and feedback.

SRO Health Check

Mitigate the performance deterioration

You ensure the integrity of your data by taking preventative action to detect issues.

Pinpoint improvements

You create your own Maximo Roadmap aligned with IBM's development plans to optimise your assets performance and lifecycle.

Maximo resilience

You gain rapid and actionable recommendations to increase the quality of your Maximo experience.
